

MANITOS COMMUNITY MEMORY PROJECT

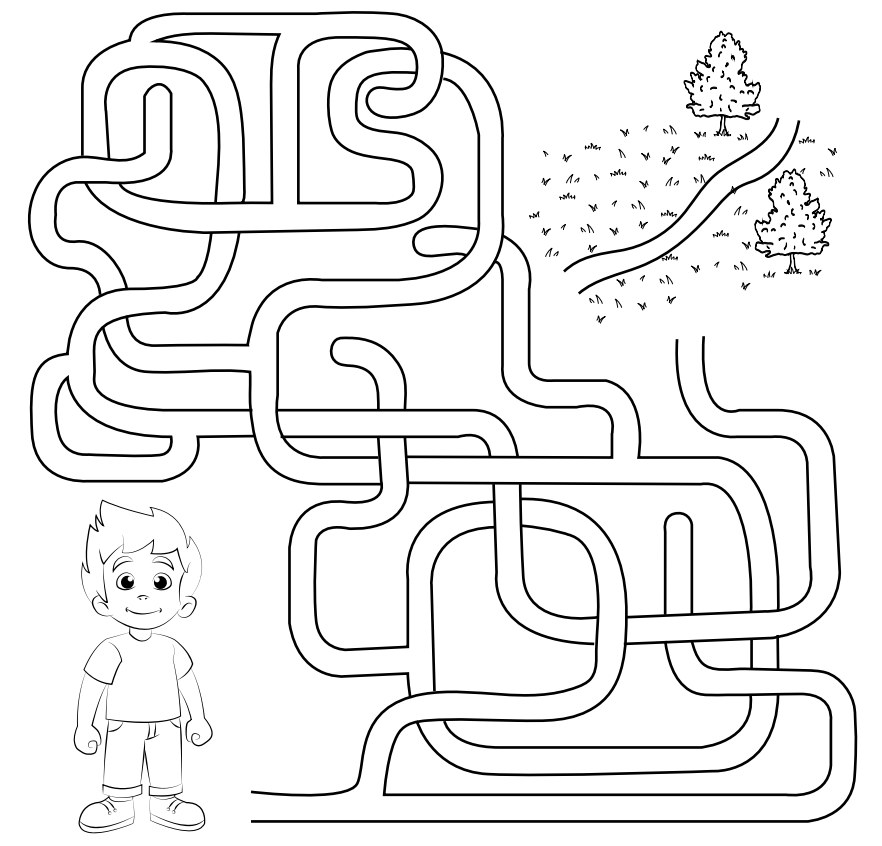

The protector of waters holds the important task of stewarding the ancient system of water irrigation in a community, including the care of the channels that carry this water to the gardens, fields and orchards.

Para nutrir a los milpas, jardines, y huertas, los mayordomos tienen la responsabilidad de administrar las acequias, un antiguo sistema de riego de agua en una comunidad.

| PRESA | HIJUELAS | PARCIANTES | REGAR |

Help Samuel get to the mayordoma so he can help clean the acequia.

Ayuda a Samuel a llegar al la mayordoma para que pueda ayudar a limpiar la acequia.

Inspired by the living culture of northern New Mexico and southern Colorado, the Manitos Community Memory Project is focused on building an archive of stories, photos and more.
